DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1-2 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims of U.S. Patent No. 6,612,182. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are both directed to the ball testing device with a cylindrical container a the same volume, and a test chamber accommodating only one ball for visually indicating an exerted force.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2855

4. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by either of Kovacs et al., or Lowe.

Both cited art directed to a container which is generally cylindrically shaped for storing more than one sport ball (Kovacs figure 2 1, Lowe figure 7 and 8), with extended volume that can be called a chamber, and related indicator to provide information (indirectly) related to the condition of the ball (see, for example, Kovacs claim 5, col. 9, line 23, or Lowe col. 9, line 65).

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
